

FIG. 1b

FIG. 1a

Figure 1 is a line graph showing the dependence of the optical density of the 648 nm band on the concentration of the solution. The x-axis is labeled 'Concentration of the solution, g/l' and ranges from 0 to 1.0 with major ticks every 0.1 units. The y-axis is labeled 'Optical density' and ranges from 0 to 0.6 with major ticks every 0.1 units. The curve shows a linear increase in optical density with concentration, starting from the origin (0,0) and reaching approximately 0.55 at a concentration of 1.0 g/l. A label '648nm' points to the curve. The legend indicates 'A = 0.1 x AmAc' and 'B = Acetonitrile'.
